WORK EXPERIENCE

Android Application Developer, Internista a Domicilio

Managua

Sep 2019 - Jan 2020

I designed and developed a mobile application in which the client required that its users could keep track of their blood pressure and glucose. It also has the function of scheduling an appointment with Internista a Domicilio doctors and includes a shopping section where users can purchase products offered by the company.

This application was developed using Android Studio, the prototype design was done with InVision Studio, the database management and user authentication was done with the Firebase platform.

The application was published in the Google Play Store under the name: Internista a Domicilio.

Mobile app and web developer, MGB Legal

Managua

Sep 2018 - Sep 2019

The law firm MGB Legal, required the design and development of an application that consists of two parts, the first is based on receiving and sending emails from the firm, the second part fulfills the function of consulting, responding or deleting comments from their website. This application was programmed using Android Studio, JavaMail and Firebase.

A redesign of their website was also performed, using HTML, PHP, CSS, JavaScript and WordPress.

Website: www.mgblegal.com

Developer/Cooperator, Pollstar Software

Managua

Sep 2017 - Present

Pollstar Software is a small company that offers an ERP system and has been providing support to the client companies that use it. I have contributed to the development of some functions of the system required by the clients.

I have been in charge of the development of user manuals for some modules of the system. This system is developed in Visual Objects with DBALite database.
